REMARKS

REFERENCE COPY

DO NOT CIRCULATE

25X1X

1. Between 10 and 19 September 1951, from 700 to 1,000 air force troops were quartered in the barracks installations at Herseburg airfield. Officers observed so far included 1 lieutenant colonel, 3 majors, 8 captains, and 20 lieutenants. A soldier said that the troops came from the U.S.S.R. *
2. Source learned from conversations with runway construction specialists that the runway was suitable for heavy aircraft because its load capacity exceeded that of the usual runways by 30 percent. Concreting was being done on the west end of the taxiway south of the runway and on the two connecting lanes between the taxiway and the runway. Grading was under way on the west edge of the field. Source measured the concrete cover of the taxiway and found it to be 20 cm thick. ** The concrete layer of the taxiway had the same mixture ratio as that of the runway. The thickness of the gravel layer depended on terrain conditions and varied from 30 to 60 cm. Source considered the landing field not serviceable based on the presence of 500 to 600 laborers. The previously discharged workers were rehired for other undetermined work. *** Three hangars whose doors were open had newly tarred roofs. Empty basket containers for shells and ammunition boxes were carried away from the ordnance depot.
3. The street, which runs between the landing field and the barracks installation at the field, had to be vacated between the Cerichtsrain (ridge) and the vinegar factory by all Germans by 19 September. The road to Lauchstaedt had to be detoured. Truck [REDACTED] was repeatedly observed at the field.

25X1C

25X1A* [REDACTED] Comment. For sketch of barracks installations, see Annex. The information that the troops allegedly came from the U.S.S.R. is believed to be incorrect. The troops probably were the advance detail of a unit stationed in the Soviet Zone of Germany.

25X1A** [REDACTED] Comment. The reported thickness of the concrete cover is believed to be correct. Same source previously reported a thickness of 30 cm which was believed to be too high.

25X1A*** [REDACTED] Comment. According to rumors, the laborers were to be transferred to Schleuditz airfield upon completion of Herseburg airfield.

1 Annex: 1 - sketch on ditto.

CLASSIFICATION ~~CONFIDENTIAL~~ CONTROL/US OFFICIALS ONLY

CONFIDENTIAL
